TECHNICAL INFORMATION

Roller Paste

Roller Paste, Roller Deglazer & Decalcifier

Is a roller cleaning paste facilitating fast ink changes and convenient alternating use of conventional ink.

Roller Paste is applied by hand and provides for fast, caring and pore-deep cleaning of the ink rollers.

Features:-

1. Roller deglazer in an easily knifeable paste; no waste, no drips
2. Removes ink residues and decalcifies rollers with one application
3. Removes calcium salts from rollers without the need for strong acid solutions; does not fume or attack metal components, Roller Paste may be used without the need for acid resistant gloves
4. Returns rollers to as-new condition by completely removing all printing residues from the rubber surface, without damaging the rubber in any way

Directions for use :-

1. Wash the ink rollers with roller washing solvent
2. Apply and spread Roller Paste evenly with a plastic ink knife
3. Allow to act for five minutes or longer, depending on the degree of contamination
4. Wash the rollers with an appropriate washing program
5. Protect Roller Paste against frost

Important :-

We recommend the regular use of Roller Paste, as it improves the ink reception properties of the rollers and thus provides for better print quality. At the same time, the amount of waste produced at ink changes is reduced.

Packaging :-

Roller Paste is supplied in 1Kg cans.
